

When it comes to engaging on the Internet, all is not as it seems

TREAT Battery-saving app

TRICK Excessive permissions unlock a dark side² The functionality of the ad-clicker is hidden with

the rest of the battery saver code. While seemingly harmless, the ad-clicker also steals information from the phone, including phone numbers, phone type/brand/model, location, and more.

Make targeted changes to JavaScript on high profile sites to steal credit card details. In the case of Newegg, an additional 15 lines of code was all that was needed to steal card details at time of purchase.

TRICK You could be purchasing more than you bargained for³ Alexa shows that **Newegg is** the 161st most popular site in the U.S.

TREAT An offer you can't refuse

TRICK This scam doesn't let the victim leave the page⁴

For-loop alerts and a function called 'openMultipleTabs,' keeps the victim glued to the web page.

TREAT Cryptocurrency investment sites

TRICK "Lose your investment" sites⁵

Cybercriminals use messages on social media and posts on forums to direct users to illegitimate clones of Bitcoin wallet sites where they steal your credentials to gain access to your wallet.

Fundstrat reported that the cost of mining a single Bitcoin reached about **\$8,038.**

An upwards of **50,000** total websites have been observed using Coinhive, the most popular cryptocoin, in the past year.
