

# Protect Your Brand, From External Threats

Shield Your Digital Identity. Protect Customers. Takedown Attackers.

## THE CHALLENGE

Your brand is your business in the digital age. RiskIQ helps protect your brand with active mapping, monitoring, mitigating, and managing external threats and schemes against your digital identity.

Security intelligence makes it easy to find and take down.

- Typosquat domains
- Phishing
- Mobile App Impersonation
- Exposed Credentials
- Bank Numbers
- Brand Impersonation via Social Media
- Code Breaks
- Weaponized Impersonations
- Domain Infringement

RiskIQ virtual users search for web content using a combination of threat feeds and configured search engine searches for brand keywords to encounter threats the same way real users targeted by them do.

## THE SOLUTION

### Discover and Eliminate Typosquatting

Attacker-aware machine learning and open search, including DNS change detection and history. RiskIQ monitors for typosquat domains that can be used in phishing campaigns. Along with integrated GSB services, RiskIQ is at your command to take down brand threats to stop them in their tracks.

### Unify Intelligence, Pinpoint Data Leaks

The frequency of brand attacks can overwhelm security teams, RiskIQ discovers sensitive data, including PII, PFI, and corporate information from leaks —precisely tuned to your unique brand. Security teams can gain visibility over their digital footprint to extend protection to their public-facing assets.

## WHY RISKIQ?

**Complete Cloud Intelligence** from full DOM capture, analysis and simulated human-web activity

**Always-on Detection** to pinpoint cloud and digital changes, encoded insights for rapid response

**Continuous Inspection** discovering attack-exposed assets and exploitable components

### Global Internet Graph

RiskIQ extracts and normalizes internet-scale data and includes 10+ years of data history, active crawling, asset inspection and machine learning to encode security expertise. Secure expansion beyond the firewall and identify hidden risks and threats to safeguard digital strategies.

### Pinpoint Abuse, Take Action

Security Intelligence from RiskIQ generates alerts and reports that provide key insights on how to remediate and take down brand attacks with focus on:

- Typosquatting sites, domains, and hosts
- Misleading social media accounts
- Other forms of brand abuse
- Attribution

### SOLUTION OVERVIEW

With RiskIQ, enterprises safeguard digital strategies by discovering their assets outside the firewall and commanding the attack surface with global visibility and control.

#### No-Agent Sensor Network

identifies cloud infrastructure, apps and services, edge connections, full DOM extraction and human-web simulation

#### Connected Cloud Services

automated internet graphing, uncovering the global internet fabric—including third-parties, apps and services

#### Automated Change Detection

encoded detection logic and smart graphing across infrastructure, services, apps, code, and components

#### Pre-built Risk Indicators

readymade and custom metrics with statistical analysis across 200+ risk/threat indicators

#### Trusted Data Internet Fabric

enriched asset intelligence—open ports, hosts, pages, components, CVEs, and relationships
